

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of claims:

Claims 1-8 (canceled).

Claim 9 (new): A mobile communication terminal operatively coupled to at least two mobile radio communication systems in respectively associated mobile radio networks each of which provides a user of the communication terminal with a number of services of different type, comprising:

parts for receiving data records that are respectively associated with a type of the service available in the networks; and

a processor for processing the data records to identify the types of services available.

Claim 10 (new): The communication terminal as claimed in claim 9, wherein services of the same type which are repeatedly provided by the mobile radio networks are respectively stored using the data records in the communication terminal in the form of a list of service types.

Claim 11 (new): The communication terminal as claimed in claim 10, wherein entries in the list of service types have different priority.

Claim 12 (new): The communication terminal as claimed in claim 11, wherein an assessment criterion is defined for the priority.

Claim 13 (new): The communication terminal as claimed in claim 12, wherein the assessment criterion is user-defined.

Claim 14 (new): The communication terminal as claimed in claim 10, wherein the list can be shown on a display device on the communication terminal,

and selection means are provided for selecting a service of a desired service type from the list.

Claim 15 (new):: A communication system, comprising:
at least one mobile communication terminal operatively coupled to at least two mobile radio communication systems in respectively associated mobile radio networks, each of which provides a user of the communication terminal with data records associated with a number of services of different types;
parts in the mobile communication terminal for receiving the data records;
and
a processor located in the mobile communication terminal for processing the data records to identify the types of services available.

Claim 16 (new): The mobile radio arrangement as claimed in claim 15, wherein the data records contain information which allows the associated services to be assessed by the user.
